

Students and Lecturers Social Event

2018 and a new academic year at the Nelson Mandela University for our first year Chemical Process Technology (CPT) students.

One of the happenings during the orientation period for our new students is a “Meet your lecturers” session, whereby students and staff get to know each other; this event took place on Thursday 1 February 2018 at InnoVenton.

Thanks to the generous donations made by BASF, Clariter, Heraeus and Umicore, students were treated on fruit drinks, lollipops, crisps and chocolates. Furthermore, a lucky draw saw students receiving stationery from highlighters to flash drives and, in addition, all received a smart notebook with pen.

The participants were divided in two groups who competed against each other: playing 30 seconds and jenga, followed by building a 3-D puzzle and the challenging wire loop game. The groups were awarded prizes and every person received another gift.

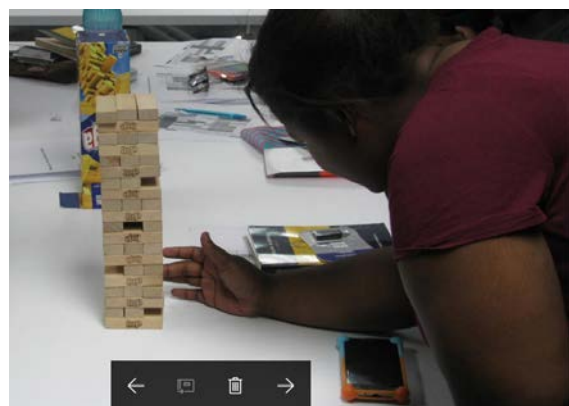

Smiley faces left the fun and games session. 😊

On behalf of our CPT students and staff: Thank you to all the Chemical Process Technology sponsors!
